

Project #MW86520 - Evangelical Bible College of Malawi

Vision

This project envisions Evangelical Bible College of Malawi to develop its dynamic and vibrant ministry, while remaining authentic and relevant, in training competent spiritual leaders for evangelical churches in Malawi.

Project background

The college needs additional funding to maintain and expand the college's facilities. Most of the students at the college come from poor rural areas in Malawi and Mozambique, and so already find it difficult to raise funds for tuition and boarding. In order to keep the fees at a reasonable level, funds for capital enhancements at the college need to be sought from other sources.

Every 5 years, EBCoM articulates its strategic priorities through its development plan. This project seeks to fund 5 selections from these priorities: facilities (chapel & staff housing), administration (endowment fund), staff (ongoing professional education as recommended & initiated by the college management team), educational programmes (resources in Chichewa language).

Prayer requests

Pray for finalisation of the 5 yr strategic plan

Pray for the accreditation processes with NCHE (National Council for Higher Education) and ACTEA (Association for Christian Theological Education in Africa)

Give thanks for a large donation which has come to the college (separately from SIM) to help with some infrastructure programmes
